

How to Run the system -

1) Download the “shakespeare_slm_dataset” folder and the “assignment2_shakespeare_rag.py” code file and place it within folder called “assignment2” within your desktop.

2) Open Terminal -> run the following commands in sequence:

1) `cd ~/Desktop/assignment2`

2) `ls`

3) `pip install sentence-transformers transformers torch scikit-learn pandas matplotlib seaborn accelerate rank_bm25`

4) `python assignment2_shakespeare_rag.py --dataset ./shakespeare_slm_dataset`

3) After asking Questions, type “quit” to exit and end the program.

4) The analysis results will be stored within the

“assignment2” folder.

Please find attached, the Demo Video link of system execution & analysis (We have uploaded the video on drive due to file size. Kindly download and review - Click below) -
